

Startup & Store Expansion Performance Analysis

1. Project Objective

Analyze the performance of **New Expansion** stores compared with **Old** stores, identify the best-performing regions, states, cities, and stores, and turn the analysis into actionable **Business Insights and Recommendations**.

2. Business Questions

A. New vs Old Stores

1. Do **New Expansion** stores generate higher Revenue than Old stores?
 2. Do New Expansion stores generate higher Profit?
 3. Do New Expansion stores have a higher ROMS?
 4. Do New Expansion stores have a higher ROMS%?
 5. Do New Expansion stores require higher Marketing Spend?
 6. Is the company's expansion strategy successful overall?
-

B. Regional Analysis

7. Which Sales Region generates the highest Revenue?
 8. Which Sales Region generates the highest Profit?
 9. Which Sales Region has the highest ROMS%?
 10. Is **Region 1** performing better than **Region 2**?
 11. Does New Expansion performance differ between regions?
-

C. City & State Analysis

12. What are the **Top 10 cities by Revenue**?
13. What are the **Top 10 cities by Profit**?
14. Which cities have the highest ROMS%?
15. Which cities have the lowest Profit?
16. Which cities have high Marketing Spend but low Revenue?

17. Which states have the strongest overall performance?

D. Marketing Analysis

- 18. Is higher **Marketing Spend** associated with higher Revenue?
 - 19. Is higher Marketing Spend associated with higher Profit?
 - 20. Are there stores spending heavily on marketing but generating weak returns?
 - 21. Which stores have the best Marketing Efficiency?
 - 22. Do New Expansion stores require more Marketing Spend to generate similar Revenue?
-

E. Store Performance

- 23. What are the **Top 10 stores by Profit**?
 - 24. What are the **Top 10 stores by ROMS%**?
 - 25. What are the **Bottom 10 stores**?
 - 26. Which stores require performance improvement?
 - 27. Which stores can be considered **Success Stories**?
-

3. Key KPIs

We will calculate:

- **Total Stores**
 - **Total Revenue**
 - **Total Profit**
 - **Total Marketing Spend**
 - **Average Revenue per Store**
 - **Average Profit per Store**
 - **Average Marketing Spend**
 - **Average ROMS**
 - **Average ROMS%**
-

4. Data Cleaning Suggestions

Before analyzing the data, we will:

1. Inspect the dataset structure.
 2. Check the number of rows and columns.
 3. Check data types.
 4. Check for missing values.
 5. Check for duplicate records.
 6. Check for incorrect or inconsistent values.
 7. Clean column names.
 8. Convert columns to the correct data types.
 9. Verify the ROMS% values.
 10. Make the dataset ready for analysis.
-

5. Exploratory Data Analysis — EDA

We will use:

- `value_counts()`
 - `groupby()`
 - `agg()`
 - `mean()`
 - `sum()`
 - `median()`
 - `min()`
 - `max()`
 - `sort_values()`
 - `describe()`
-

6. Visualization Suggestions

Bar Charts

- New vs Old Revenue
- New vs Old Profit
- New vs Old ROMS%
- Region Performance
- Top 10 Cities
- Top 10 Stores

Scatter Plots

- Marketing Spend vs Revenue

- Marketing Spend vs Profit
- Marketing Spend vs ROMS

Boxplots

- Revenue by New/Old
- Profit by New/Old
- ROMS% by Region

Heatmap

- Correlation between Revenue, Profit, Marketing Spend, ROMS, and ROMS%.

7. Advanced Business Questions

These questions will help us think like a **real Data Analyst** rather than simply creating charts:

1. If the company receives an additional Marketing Budget, **where should it invest the money?**
2. Which cities are the best candidates for future expansion?
3. Which cities should the company avoid expanding into?
4. Which stores deserve additional Marketing investment?
5. Which stores should have their Marketing Spend reduced?
6. Which stores have high Revenue but surprisingly low Profit?
7. Which stores achieve high Revenue with relatively low Marketing Spend?
8. What characteristics distinguish high-performing stores from low-performing stores?
9. Is store performance driven more by **Location** or **Marketing Spend**?
10. Is the **New Expansion strategy** actually creating additional business value?
